

## Ethylene – Butyl Acrylate Copolymer

### Description

LOTRYL<sup>®</sup> 30BA320 is a random copolymer of ethylene and butyl acrylate, produced by high-pressure radical polymerization process.

### Applications

Due to the high butyl acrylate content, LOTRYL<sup>®</sup> 30BA320 can be used for applications where flexibility and polarity are required. LOTRYL<sup>®</sup> 30BA320 is particularly recommended for the formulation of hot melt adhesives.

### Typical properties

Characteristics	Value	Unit	Test Method
Butyl acrylate content	33-37	% Wt	IRTF (internal)
Melt index (190°C / 2.16 kg)	260-350	g/10min	ISO 1133 / ASTM D 1238
Density (23°C)	0.93	g/cm <sup>3</sup>	ISO 1183
Melting point	65	°C	DSC (internal)
Vicat softening point	< 40	°C	ISO 306 / ASTM D 1525
Elongation at break	200	MPa	ISO 527 / ASTM D 638
Tensile strength at break	1.5	%	ISO 527 / ASTM D 638
Hardness Shore A	52	MPa	ISO 527 / ASTM D 638

### Processing

LOTRYL<sup>®</sup> 30BA320 can be processed with standard polyolefin equipment up to 300°C and it is recommended to purge the equipment after a run is completed.

### Storage, handling and safety

LOTRYL<sup>®</sup> 30BA320 should be stored in standard conditions and protected from UV-light. Improper storage conditions may cause degradation and could have consequences on physical properties of the product.

Due to its physical properties (Vicat temperature <40°C), it may be possible that the product shows some caking. This is particularly true during summer time.

Safety data sheet as well as information on handling and storage of the LOTRYL<sup>®</sup> 30BA320 is available upon request to your ARKEMA representative or on the web site [www.lotryl.com](http://www.lotryl.com).
